

to the user. Additionally, recent indications are that the cost to initially outfit tank vessel with DGPS equipment may be less than the original estimate of \$50,000 per vessel. A more reasonable estimate now would be approximately \$15,000 per vessel. The cost is expected to drop further as dependent surveillance is implemented in other U.S. ports and worldwide.

#### Small Entities

This regulation will only affect owners and operators of tank vessels of 20,000 or more DWT operating in Prince William Sound and carrying oil from the Trans-Alaska Pipeline. The construction and operating costs of vessels of this size is such that their owners tend to be major corporations or subsidiaries of major corporations. Business entities with the capital and operating costs of this magnitude do not meet the definition of "small entities"

Therefore the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

#### Collection of Information

This rule contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

#### Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

#### Environment

The Coast Guard considered the environmental impact of this rule and concluded that under section 2.B.2 of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation.

This rulemaking is intended to improve accuracy and reliability of vessel tracking equipment. It may benefit the environment by reducing the potential for catastrophic oil spills which may result from tank vessels involved in groundings, ramming, or collisions. While this rulemaking may

have a positive effect on the environment by minimizing the risk of environmental harm resulting from collisions and groundings, the impact is not expected to be significant enough to warrant further documentation. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

#### Area 2A Non-treaty Commercial Fishery To Reopen

The September 12 fishing period in Area 2A resulted in a catch of 4,000 lb (1.81 metric tons (mt)). The revised total commercial catch from Area 2A to date is 97,000 lb (43.99 mt), leaving approximately 8,000 lb (3.62 mt) to be taken.

Area 2A will reopen on September 26 for 10 hours from 8:00 a.m. to 6:00 p.m. local time. The fishery is restricted to waters that are south of Point Chehalis, WA (46°53'18" N. lat.) under regulations promulgated by NMFS. Fishing period limits as indicated in the following table will be in effect for this opening.

Vessel class		Fishing period limit (lb)	
Length	Letter	Dressed, head-on	Dressed, head-off*
0-25 .....	A	225	200
26-30 .....	B	225	200
31-35 .....	C	285	250
36-40 .....	D	790	695
41-45 .....	E	850	750
46-50 .....	F	1,020	895
51-55 .....	G	1,135	1,000
56+ .....	H	1,705	1,500

\*Weights are after 2 percent has been deducted for ice and slime if fish are not washed prior to weighing.

The appropriate vessel length class and letter is printed on each halibut license.

The fishing period limit is shown in terms of dressed, head-off weight as well as dressed, head-on weight, although fishermen are reminded that regulations require that all halibut from Area 2A be landed with the head on.

The fishing period limit applies to the vessel, not the individual fisherman, and any landings over the vessel limit will be subject to forfeiture and fine.
